Enforcement and Compliance Options Related to EXIDE Vernon facility eja.doc

Thanks for comments/edits. Attached is a revised draft.

Dan – Is the city we’re referencing ‘Eureka, NV’?

Subject: RE: Draft EXIDE summary

Joel – I was not sure if you wanted me to add to the paper or just provide some language. I can do the former but in the recommendations section:

Region 9 can provide technical support on sampling plan design and risk communication.

A current Region 9 residential lead and arsenic clean up is addressing homes with levels exceeding 3000 ppm lead and 600 ppm arsenic. Some homes have levels that are 10 times higher and young children with blood lead levels exceeding 5 ug/dl.

Let me know if there is anything else I can do to help. Dan

Daniel Meer

Subject: Draft EXIDE summary

Please review the attached draft summary of state involvement w/Exide-Vernon facility. Let me know any changes/edit and I'll revise for Jared.
